

Splunk Boost Services

2020 Professional Services
Partner of the Year

Optimizing Your Environment

bitsIO is committed to helping you improve your Splunk environment and keep it running at its optimized state. With our Splunk Boost Services you can have a bitsIO Splunk expert run a full health check with in depth research into what might be causing you issues. After our 1 week health check, we will follow up with you on a remediation plan. Our team will recommend best ways to remediate the issues you are experiencing and why these will help improve your Splunk experience. We want to help you identify areas for improvement that can be done immediately to ensure Splunk is running in its optimized state while pointing out any areas for improvement for long term success.

Silver

Includes a one week health check of a Splunk environment, remediation suggestions for any findings, and a summary report.

Gold

Includes all services provided in the Splunk Boost Services - Silver, with an additional 15 days of remote professional services for remediation.

Platinum

Includes all services provided in the Splunk Boost Services - Silver, with an additional 60 days of remote professional services and 6 months of Splunk Solutions on Demand - Level 1.
